Publications may be purchased at the Australian Museum Shop or online at:
www.amonline.net.au/shop/

INSTRUCTIONS TO AUTHORS

Manuscripts must be submitted to the Editor. Authors will then liaise with a nominated Associate Editor until a work is accepted, rejected or withdrawn. All manuscripts are refereed externally.

Only those manuscripts that meet the following requirements will be considered for publication.

Submit either (a) three CDs each with all text and hi-resolution image files, or (b) three hard copies and one set of all electronic files. Attach one summary file or **cover sheet** giving: the title; the name, address and contact details of each author; the author responsible for checking proofs; a suggested running head of less than 40 character-spaces; and the number of figures, tables and appendices. Manuscripts must be complete when submitted.

Text files, tables and charts should all be in Rich Text Format (RTF). **Tables** and **figures** should be numbered and referred to in numerical order in the text. Electronic copy is stripped and reconstructed during production, so authors should avoid excessive layout or textual embellishments; avoid using uncommon fonts, a single font should be used throughout (Times or Times New Roman are preferred).

All copy is manipulated within a Windows (not Mac) environment using Microsoft and Adobe software. If hard copy is submitted then it should be printed from the electronic file that accompanies it.

Manuscripts should be prepared using recent issues as a guide. There should be a **title** (series titles should not be used), **author(s)** with their institutional and e-mail addresses, an **abstract** (should be intelligible by itself, informative not indicative), **introduction** (should open with a few lines for general, non-specialist readers), **materials and methods**, **results** (usually subdivided with primary, secondary and sometimes tertiary-level headings), **discussion**, **acknowledgments** and **references**. If appropriate, an appendix may be added after references.

In the **titles** of zoological works the higher classification of the group dealt with should be indicated. Except for common **abbreviations**, definitions should be given in the materials and methods section. Sentences should not begin with abbreviations or numerals. Metric units must be used except when citing original specimen data. It is desirable to include **geo-spatial coordinates**; when reference is made to them, authors should ensure that their format precludes ambiguity, in particular, avoid formats that confuse arcminutes and arcseconds.

Label and specimen data should, as a minimum requirement, indicate where specimens are deposited. Original specimen data—especially that of type material—is preferred over interpreted data. If open to interpretation, cite original data between quotation marks or use “[sic]”.

Rules of the International Code of Zoological Nomenclature must be followed; authors must put a very strong case if a Recommendation is not followed. When new taxa are proposed in works having **multiple authors**, the identity of the author(s) responsible for the new name(s) and for satisfying the criteria of availability, should be made clear in accordance with Recommendations in Chapter XI of the Code. In the view of the Editorial Committee, a scientific name with more than two authors is unwieldy and should be avoided. **Keys** are desirable; they must be dichotomous and not serially indented. **Synonymies** should be of the short form: taxon author, year, pages and figures. A period and dash must separate taxon and author except in the case of reference to the original description. Proposed type material should be explicitly designated and, unless institutional procedure prohibits it, registered by number in an institutional collection.

Authors submitting hardcopy—option (b) above—should retain **original artwork** until it is called for. Previously published illustrations will generally not be accepted. Non-colour artwork may be submitted either as **digital images** or as hard copy. Colour artwork must be submitted electronically and require no touch-

up. The author and figure number must be clearly marked on each piece of artwork or in the name of each file. Extra costs resulting from **colour** production are charged to the author. All artwork must (a) be rectangular or square and scalable to a width of 83 mm (one text column) or 172 mm (both text columns) and any depth up to 229 mm (the number of lines in a caption limits depth); (b) have **lettering** similar to 14 point, upper case, normal, Helvetica, in final print; (c) have no unnecessary white or black space; and (d) have vertical or horizontal **scale bars**, with the lengths given in the caption and with the thickness of an upper case 14 point letter “i”.

Hard copy halftone or black and white artwork submissions must meet the following requirements: (a) they must be no larger than A3; (b) the dimension of artwork should not be less than the desired final size; (c) **halftones** and **line-drawings** must be mounted separately; (d) lettering, scales and edges—especially of halftone artwork—must be sharp and straight (images or maps should not be enclosed within a box); (e) photographic **negatives** can be used in production, but positive images with labels are, of course, required by referees.

Colour images must be submitted electronically (black and white images may be submitted electronically); all digital images must be presented as TIFF, or as multilayered PSD files suitable for *Adobe Photoshop* version 5.0 or later. Halftone and colour images must be at a minimum **resolution** of 300 dpi at final size (2040 pixels = width of page) and all labelling must be sharp (with *anti-aliased* active). Black and white line images (bitmaps) must be at a minimum resolution of 1200 dpi at final size (8160 pixels = width of page).

When reference is made to **figures** in the present work use Fig. or Figs., when in another work use fig. or figs.; the same rule applies to tables. Figures should be numbered and referred to in numerical order in the text.

Authors should refer to recent issues of the *Records of the Australian Museum* to determine the correct format for listing **references** and to *The Chicago Manual of Style* to resolve other matters of style.

Certain **anthropological manuscripts** (both text and images) may deal with culturally sensitive material. Responsibility rests with authors to ensure that approvals from the appropriate person or persons have been obtained prior to submission of the manuscript.

Stratigraphic practice should follow the *International Stratigraphic Guide* (second edition) and *Field Geologist's Guide to Lithostratigraphic Nomenclature in Australia*.

The Editor and Publisher reserve the right to modify manuscripts to improve communication between author and reader. Essential corrections only may be made to final **proofs**. No corrections can be accepted less than six weeks prior to publication without cost to the author(s). All proofs should be returned as soon as possible. Page **charges** may apply for large works. Authors of a paper in the *Records* receive a total of 50 free **offprints**. Authors of a *Supplement* or *Technical Report* receive a total of 25 free offprints. If offprints exceed 1kg international authors will be charged mailing costs.

All authors must agree to publication and certify that the research described has adhered to the Australian Museum's *Guidelines for Research Practice* (www.amonline.net.au/about/research_ethics.htm)—or those of their home institution providing they cover the same issues, especially with respect to authorship and acknowledgment. Agreement can be registered by signing and returning the Editor's letter that confirms our receipt of a submitted manuscript. While under consideration, a manuscript may not be submitted elsewhere.
